IT Solution Engineer with 5+ years of experience in system integration, digitalization projects, enterprise applications, and logistics technology solutions. Experienced in end-to-end solution implementation, including requirements gathering, API and ERP integrations, ETL pipelines, database management, testing, deployment, and post-implementation support. Hands-on experience with logistics platforms, WMS/TMS environments, SAP integration, SQL databases, operational reporting, and workflow automation. Strong background in translating business requirements into scalable technical solutions and collaborating with cross-functional teams to support business operations.

Pengalaman Kerja

Trans Continent - **Jakarta, Indonesia** Jul 2025 - Sekarang

IT Project & Systems Engineer

Logistic Company

- Lead end-to-end implementation of logistics digital solutions, including requirement gathering, system design, integration, testing, deployment, and post-implementation support.
- Develop and support logistics platforms for shipment tracking, warehouse visibility, job order management, cargo monitoring, and heavy-lift logistics operations.
- Design and maintain system integrations and APIs to enable reliable data exchange between logistics applications and enterprise systems.
- Extract, transform, and manage operational data to support dashboards, KPI monitoring, reporting, resource planning, and business decision-making.
- Optimize SQL databases and cloud infrastructure to improve scalability, system reliability, and availability of mission-critical logistics applications.
- Investigate and troubleshoot application, integration, and data-related issues to ensure continuity of business operations.
- Collaborate with business stakeholders and cross-functional teams to translate operational requirements into scalable technical solutions.
- Lead and guide development teams while maintaining coding standards, project governance, and delivery quality.
- Developed and maintained operational reports using Crystal Reports to support business reporting and data analysis requirements.
- Managed application incidents and service requests, troubleshooting technical issues and ensuring resolution within agreed SLAs.
- Coordinated with IT vendors and external service providers for application maintenance, technical support, issue resolution, and system implementation.

Semesta Energy Service - **Jakarta, Indonesia** Apr 2025 - Dec 2025

Software Architect

IT Solution Company

- Designed system architecture, database structures, and enterprise application integrations based on business and technical requirements.
- Designed and implemented ETL pipelines integrating DELMIA Quintiq with legacy Pertamina systems, ensuring reliable data exchange across enterprise platforms.
- Maintained data flows and synchronization processes within enterprise data lake environments.
- Developed automation solutions for data extraction and reporting processes to improve operational efficiency.
- Extracted, transformed, and prepared data from enterprise databases for Power BI dashboards and business reporting.
- Managed application incidents and service requests, troubleshooting technical issues and ensuring resolution within agreed SLAs.

KB Insurance Indonesia - **Jakarta, Indonesia** May 2023 - Mar 2025

Sr Software Engineer

General Insurance Industry

- Developed and maintained REST APIs to support enterprise application integration, scalability, and reliable data exchange.
- Led SAP interface integration initiatives using APIs and middleware to ensure reliable synchronization between SAP and internal systems.
- Collaborated with cross-functional teams to analyze business requirements and enhance system performance and user experience.
- Coordinated development initiatives and implemented application security standards for business partner solutions.
- Managed application incidents and service requests, troubleshooting technical issues and ensuring resolution within agreed SLAs.

Penabur Primary Kelapa Gading - **Jakarta, Indonesia** Sep 2022 - Apr 2023

ICT Teacher
